WOLF D. KUHLMANN, Dozent Dr. med. habil.,

Laboratory of Immunocytochemistry  
SFB 136 Krebsforschung, University of Heidelberg and  
Institut für Nuklearmedizin, Deutsches Krebsforschungszentrum  
6900 Heidelberg (Germany)

Dr. W. D. Kuhlmann was awarded the Robert Feulgen Prize 1976 of the Gesellschaft für Histochemie for his work in the field of immunocytochemistry.

*Acknowledgements*

This research was supported by the Deutsche Forschungsgemeinschaft (Ku 257/2 and SFB 136, publ. no. 13) Bonn, Germany.

Much of this work was done in collaboration with Dr. W. Bernhard (Institut de Recherches Scientifiques sur le Cancer, Villejuif, France), Dr. S. Avrameas (Institut Pasteur, Paris, France) and Dr. M. Bouteille (Laboratoire de Pathologie Cellulaire, Université de Paris VI, France), whom I thank for facilities provided in their laboratories.

## Contents

Immunocytochemistry as a Tool for Structural and Functional Studies in Biomedicine . . . . .	1	3.3.2 Cellular Detection of Immunoglobulins by Use of Antibody-Peroxidase Conjugates . . . . .	12
Part I		3.3.3 Influence of Aldehydes on Immunocyto-logical Reactions . . . . .	14
Ultrastructural Localization of Intracellular IgG Globulins by Use of Peroxidase Labeled Antibodies . . . . .	2	3.3.4 Penetration of Conjugates into Tissue Preparations . . . . .	14
1 Introduction . . . . .	2	4 Discussion . . . . .	18
2 Materials and Methods . . . . .	3	4.1 Preparation of the Immunocytochemical Reagents . . . . .	19
2.1 Experimental Animals . . . . .	3	4.1.1 Isolation of Specific Antibodies from Immune Sera . . . . .	19
2.2 Preparation of Hyperimmune Sera . . . . .	3	4.1.2 Covalent Coupling of Antibody and Peroxidase Molecules . . . . .	20
2.2.1 Isolation of Specific Antibodies by Use of Cross-Linked Antigen Derivatives . . . . .	4	4.1.3 Characterization of Antibody-Peroxidase Conjugates . . . . .	21
2.2.2 Isolation of Specific Antibodies by Antigens Coupled with Sepharose . . . . .	4	4.2 Use of Peroxidase Labeled Antibodies for the Detection of Intracellular Components . . . . .	23
2.2.3 Production of Antibody Fragments . . . . .	5	4.2.1 Importance of Tissue Fixation for Immunocytological Staining . . . . .	23
2.3 Conjugation of Antibodies with Peroxidase by Use of Glutaraldehyde . . . . .	5	4.2.2 Processing of Organs for Specific Intracellular Localization of Immunoglobulins . . . . .	24
2.3.1 One-Step Method . . . . .	5	4.2.3 Specificity and Control of Immunocyto-chemical Reactions . . . . .	25
2.3.2 Two-Step Method . . . . .	5	5 Summary of Part I . . . . .	26
2.4 Purification of Labeled Antibodies and Characterization of the Conjugates . . . . .	5	Part II	
2.4.1 Gel Filtration with Dextran-Gel Sephadex . . . . .	5	Lymphocyte Differentiation and Localization of Specific Antibodies during the Immune Response after Peroxidase Stimulation . . . . .	27
2.4.2 Detection of Peroxidase and Antibody Contents in Conjugates . . . . .	6	1 Introduction . . . . .	27
2.4.3 Gel Diffusion and Enzyme-Immunoelectrophoretic Analyses . . . . .	6	2 Materials and Methods . . . . .	28
2.4.4 Light Microscopic Control of the Conjugates . . . . .	6	2.1 Experimental Animals and Immunization Schedules . . . . .	28
2.5 Preparation of Tissues for Immunoelectron Microscopic Cytology . . . . .	6	2.1.1 Primary Immune Response . . . . .	28
2.5.1 Fixation Schedules for Tissue Blocks . . . . .	7	2.1.2 Secondary Immune Response . . . . .	28
2.5.2 Preparation of Cryostat Sections and Cryo-Ultramicrotomy . . . . .	7	2.1.3 Labeling with <sup>3</sup> H-Thymidine . . . . .	28
2.5.3 Treatment and Fixation of Cell Suspensions . . . . .	7	2.2 Detection of Circulating Antibodies in Sera . . . . .	28
2.6 Immunocytochemical Procedures and Control Reactions . . . . .	8	2.2.1 Enzyme-Immunoelectrophoretic Analysis . . . . .	28
2.7 Electron Microscopic Techniques . . . . .	8	2.2.2 Passive Hemagglutination Titer . . . . .	29
3 Results . . . . .	8	2.3 Light Microscopic Cytology . . . . .	29
3.1 Isolation of Specific Antibodies . . . . .	8	2.4 Immuno-Electron Microscopic Cytology . . . . .	29
3.1.1 Immunoabsorption with Cross-Linked Antigen Derivatives . . . . .	8	2.4.1 Fixation Schedules and Tissue Processing . . . . .	29
3.1.2 Immunoabsorption with Sepharose Affinity Chromatography . . . . .	9	2.4.2 Immunocytochemical Procedures and Control Reactions . . . . .	29
3.2 Conjugation of Antibodies with Peroxidase . . . . .	9	2.5 Electron Microscopic Techniques . . . . .	29
3.2.1 Conjugates of the One-Step Method . . . . .	9	2.6 High Resolution Autoradiography . . . . .	30
3.2.2 Conjugates of the Two-Step Method . . . . .	10	3 Results . . . . .	31
3.3 Immuno-Electron Microscopic Cytology . . . . .	11		
3.3.1 Specificity and Control Reactions . . . . .	12		

3.1	Serological and Light Microscopic Observations . . . . .	31	4.2.1	Primary Immune Response . . . . .	45
3.1.1	Primary Immune Response . . . . .	31	4.2.2	Secondary Immune Response . . . . .	45
3.1.2	Secondary Immune Response . . . . .	31	4.3	Cellular Reactions to Peroxidase Stimulation . . . . .	45
3.2	Immuno-Electron Microscopic Cytology . . . . .	31	4.3.1	Primary Immune Response . . . . .	45
3.2.1	Specificity and Controls . . . . .	32	4.3.2	Secondary Immune Response . . . . .	47
3.2.2	Ultrastructure of Immunocytes during the Primary Immune Response . . . . .	32	4.3.3	Excretion of Antiperoxidase Antibodies . . . . .	47
3.2.3	Ultrastructure of Immunocytes during the Secondary Immune Response . . . . .	38	4.4	DNA Replication and Antibody Synthesis . . . . .	47
3.3	Correlation of DNA Replication and Antiperoxidase Antibody Synthesis . . . . .	42	4.5	Specificity and Control Reactions . . . . .	49
4	Discussion . . . . .	42	5	Summary of Part II . . . . .	49
4.1	Ultrastructure of Immunocytes Synthesizing Antiperoxidase Antibody . . . . .	44	References . . . . .		50
4.2	Timing of Specific Antibody Production . . . . .	44	Subject Index . . . . .		55
